Management Discussion of Fund Performance

Investment Objectives and Strategies

This Fund invests in common shares and other equity securities of established United States issuers.

The Fund's advisor selects equity securities from a universe of potential candidates whose management have consistently demonstrated a commitment to create shareholder value without undue financial leverage. A value approach is applied, and research is directed to identify stocks which can be purchased at a reasonable price by analyzing relative valuation measures such as the issuer's price/earnings, price/cash flow and price/book value relative to its own history, the overall market and to its sustainable earnings growth rate.

The fundamental investment objective of the Fund cannot be changed without the approval of a majority of the investors who own units in the Fund.

Risk

The risks of investing in this Fund remain as discussed in the Prospectus.

This Fund continues to be suitable for investors who seek long-term capital appreciation in American issuers with a medium tolerance for risk and a long-term investment horizon.

Results of Operations

The Beutel Goodman American Equity portfolio posted a positive return and outperformed its S&P 500 (C\$) Index benchmark over the period.

The year started off in a state of pessimism with thoughts of recession, and contagion from a weakening Chinese economic outlook. Positive economic data and further central bank stimulus served to reverse the early year trends until the results of the British referendum on membership in the European Union caught markets completely off guard. Immediate market reaction to Brexit was visceral, with a massive flight to quality trade that sent stocks plummeting, bond yields spiraling down, gold up, oil down, the euro and pound freefalling and the U.S. dollar appreciating. Some relative calm returned to the market as it became clear that it will be a long and winding path for Great Britain to exit the European Union. A great deal of market reaction to the referendum result reversed and attention then shifted to economic data releases, central bank think and the U.S. election.

Once again the polls and the markets got the results incorrect and the Donald Trump Presidential election victory was mostly a shock. The first reaction in the early hours after it looked like Trump would win, was the risk off safe haven flow that most had predicted reflecting the uncertainty of a Trump Presidency. Sentiment quickly shifted as the markets embraced Trump's promises of massive debt-financed infrastructure spending and tax cuts, believing that the campaign promises would be enacted as laid out thereby leading U.S. economy out of economic malaise with strong growth and higher inflation. There was also hope that a Republican controlled Presidency and Congress would end the gridlock of the past several years. In a repeat of the taper tantrum of May 2013, bond yields increased rapidly in the days following the election from repressed and

oversold levels to levels more in line with fair value given the economic backdrop. Prior to the election, U.S. economic data was improving, but the market was more focused on the election uncertainty rather than the data so there was also some catch up being played during the bond market sell-off. Stock markets and the U.S. trade-weighted dollar were also strong post-election. Markets enter 2017 with visions of growth, inflation and rate hikes dancing in their heads.

The fund's outperformance was primarily due to stock selection, but with positive effects from sector allocation as well. In spite of negative effects from an underweight Energy and an overweight in Health Care, sector allocation added value due to overweights in Industrials, Financials and Telecommunications and an underweight in Consumer Discretionary. The largest contribution to stock selection came from Industrials, as Parker Hannifin, Ingersoll-Rand and Caterpillar outperformed significantly over the period. Selection in Health care added value as holdings in Baxter, Baxalta, Merck & Co and Johnson & Johnson all had double digit returns over the period, significantly outperforming the negative return of the sector. Selection in Energy added value due to the Fund's single holding in the sector, Halliburton.

During the year, the Fund sold positions in Kohls and Baxalta and added new positions in Amerisource-Bergen and Cadence Design. Other transactions in the period mostly involved taking advantage of volatility to trim some of the better performers and add to others with relatively more attractive upside potential.

Detailed performance is provided under the heading "Past Performance" in this report.

Recent Developments

On November 15, 2016, Stanley Wu joined as Vice President, U.S. and Global Equities.

The Trump election victory was an earthquake that shocked the world and led to a reaction in the markets that few, if any, market participants expected. Even if one were to "call" the election correctly and set up a portfolio in a certain way to benefit that call, predicting all of the linkages between a Tweeted tax plan and an individual stock price move is difficult. Beutel Goodman focuses only on what they can control – buying great franchises, being patient and disciplined to pay the right price, with a mechanism in place to ensure they capture capital gains or sell stocks when they reach target prices. During emotional times in the market, the portfolio manager strives to be emotionally detached to capitalize on the reactions of others.

The year-end rally made the task of adding new holdings to the portfolio that meet high (and strict) hurdle rates more challenging. The portfolio manager will maintain patience and discipline knowing that, at times, doing nothing is the best decision. While challenges mount to add new positions, the Fund's highest conviction names still carry significant potential returns to targets (Verizon, Parker Hannifin, American Express and Oracle to name a few). On a fundamental basis, the portfolio manager still sees opportunities to garner attractive long-term returns for unit holders.

The jagged market moves over the past few months led to some structural changes in the portfolio. With the addition of AmerisourceBergen as a

new holding and an increase in Eli Lilly on weakness, the Fund moved from slightly underweight to overweight in Health Care. The portfolio manager recognizes the headline risk of adding to the sector, given the intensified political focus on pricing and healthcare costs. However, these headlines have given the opportunity to add to positions in quality franchises that generate high returns, where the future value creation is predicated on scale advantages and innovation, not aggressive pricing schemes. When headlines fade, fundamental values will persist and surface as sentiment shifts. In Financials, trims of both BB&T and JP Morgan, as the stocks hit their respective target prices, were offset slightly by an increased weight in Ameriprise Financial, as the overweight position in this sector decreased. In Industrials, following a one third sale of CSX and a trim of Caterpillar to make room for AmerisourceBergen, the Fund remains well overweight the group.

All holdings in the portfolio continue to generate free cash flow, have strong balance sheets and capital allocation policies that strike the right balance between corporate needs and shareholder returns. High quality business models and company-specific catalysts factor into attractive risk/reward profiles and, importantly, downside protection. The portfolio continues to incorporate a high concentration of companies with under-levered balance sheets and managements that are well aligned with shareholders, which the portfolio manager expects will continue to lead to positive corporate actions like share buy-backs, dividend increases and value-enhancing deals.

Related Party Transactions

Beutel, Goodman & Company Ltd. is the Portfolio Advisor to this Fund. The Fund did not rely on any recommendation or approval of its Independent Review Committee to proceed with any transaction involving related parties because it did not conduct any related party transactions, except for certain inter-fund trades, as approved by the Independent Review Committee by standing instructions, and subject to regulatory requirements.

Fees and Expenses

The following table lists the fees and expenses that you may have to pay if you invest in the Beutel Goodman Managed Funds. You may have to pay some of these fees and expenses directly. The Funds pay the other fees and expenses. This will reduce the value of your investment in a Fund.

Management Fees: We are entitled to a management fee from each class of each Fund based on the average daily net asset value of the particular class. The fee is payable monthly, in arrears, and is calculated at the annualized rate specified for each class of each Fund below. Management fees for Class I units are negotiated and paid directly by the investor, not by the Fund, and, therefore, are not listed.

Fund	Class	Management Fees (%) ⁽¹⁾
American Equity Fund	B	up to 1.85
American Equity Fund	D	up to 1.25
American Equity Fund	F	up to 0.90

(1) Excludes GST/HST where applicable.

We may reduce our management fee for certain large investors who have substantial holdings in units of a Fund. To accomplish this, we reduce the management fee we charge to the Fund and the Fund pays out the difference to these investors as a special distribution. This is called a management fee distribution. We calculate and accrue the reduction daily and distribute it quarterly. The distribution is reinvested on behalf of such unitholders in additional units of the same class of the Fund. Management fee reductions for a unitholder may be increased at any time, but may only be decreased after at least 60 days' prior written notice has been given to such unitholder.

We may waive our management fee in certain circumstances.

The Fund paid the Manager management fees, inclusive of HST, of \$2,881,175 for the year ending December 31, 2016. The management fee for each class of unit is calculated as a percentage of its net asset value as of the close of business on each business day. The Fund's management fees were used by the Manager to pay costs for managing the investment portfolio, providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio and providing other services. The Manager also used the management fees to fund commission payments and other dealer compensation (collectively called "distribution-related costs") to registered dealers and brokers and financial consultants for units of the Fund bought and held by investors, which amounted to 26.73% of total management fees paid by the Fund to the Manager.

Operating Expenses: The Manager pays certain operating expenses of the Fund. These expenses include audit and legal fees; custodian and transfer agent fees; costs attributable to the issue, redemption and change of units, including the cost of the security holder record-keeping system; expenses incurred in respect of preparing and distributing all regulatory reports; fund accounting and valuation costs; independent review committee fees and filing fees, including those incurred by us. In return, the Fund pays the Manager a fixed administration fee. The administration fee may vary by class of units and by Fund.

Please refer to the Financial Highlights section for the MERs of the classes of units.

Commissions

Commissions paid to brokers for portfolio transactions were as follows:

Fund Name	2016	2015
American Equity Fund	434,126	566,472

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past 5 years ended December 31. This information is derived from the Fund's audited annual financial statements and is provided for each class of units.

Financial Highlights for Class B Units (for the years ended December 31)

- (1) The information for December 2016, December 2015, December 2014 and December 2013 is derived from the Fund's annual audited financial statements prepared in accordance with IFRS. The information for prior years is derived from the Fund's annual audited financial statements prepared based on Canadian GAAP.
- (2) Net assets attributable to holders of redeemable units per unit and distributions to holders of redeemable units per unit are based on the actual number of redeemable units outstanding for the relevant class at the relevant time. The increase (decrease) in net assets attributable to holders of redeemable units per unit is based on the weighted average number of redeemable units outstanding for the relevant class over the fiscal year.
- (3) Distributions were paid in cash or automatically reinvested in additional redeemable units of the Fund.
- (4) This is not a reconciliation of the beginning and ending net assets per redeemable unit.
- (5) This information is provided as at year end of the year shown.
- (6) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily net asset value during the year.
- (7) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal year. The higher a Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate equals the lesser of purchases or sales divided by the average value of the portfolio securities of the Fund on a monthly basis, excluding short-term securities.
- (8) The trading expense ratio represents total commissions and other portfolio transaction costs disclosed in the Statements of Comprehensive Income expressed as an annualized percentage of daily average net asset value of the Fund during the year.
- (9) The information for December 2016, December 2015, December 2014 and December 2013 is derived from the Fund's annual audited financial statements prepared in accordance with IFRS. Prior to January 1, 2013, for the purpose of processing unitholder transactions, net assets were calculated based on the closing market price, while for financial statement purposes net assets were calculated based on bid/ask price. For the years ended December 31, 2016, December 31, 2015, December 31, 2014 and December 31, 2013, the information provided for processing unitholder transactions is consistent with the information provided for reporting purposes.

Past Performance

The past performance of each class of units of a Fund, if the class has been in continuous existence and offered to the public for at least 12 months (at the date of this document), is explained under the Year-by-Year Returns and Annual Compound Returns headings found below. In years where the class of a Fund has less than 12 months of performance data, the annual rate of return has been annualized.

The performance returns in all cases:

- are calculated as of **December 31** in each year;
- assume **all distributions** made by the Fund are reinvested to purchase additional redeemable units; and
- show the returns of the particular class of the Fund after any applicable management fees and operating expenses have been deducted, **but are not reduced by any redemption charges, optional charges or income taxes payable by you.**

Please remember that the past performance of the Fund is not an accurate prediction of future returns.

Asset Mix

Other Material Information

Classes of Units: Each of the Funds in the Beutel Goodman family of Funds issues Class B, Class D (formerly Class A), Class F and Class I units, with the exception of the Beutel Goodman Fundamental Canadian Equity Fund, Beutel Goodman Global Dividend Fund and Beutel Goodman Short Term Bond Fund, which issue only Class B, Class F and Class I units. Expenses of each class are tracked separately and a separate net asset is calculated for each class.

The Beutel Goodman American Equity Fund is available in 4 classes of units: Class B, Class D (formerly Class A), Class F and Class I.

Each Fund may issue an unlimited number of classes of units and may issue an unlimited number of units of each class. The different classes of units of a Fund represent an interest in the same portfolio investments of the Fund.

Class B Units: for retail investors investing a minimum of \$5,000 in a Fund through authorized third-party dealers;

Class D* Units: for retail investors investing a minimum of \$5,000 in a Fund;

Class F Units: for investors investing a minimum of \$5,000 in a Fund, who are enrolled in a dealer-sponsored fee-for-service or wrap program (where various mutual funds are bundled together) who are subject to a periodic asset-based fee, rather than commissions on each transaction and whose dealer has signed a Class F agreement, or any other investors for whom we do not incur distribution costs, such as our employees (or affiliated corporations);

Class I Units: for investors who have invested a minimum of \$500,000 in a Fund and who have entered into an investment management agreement with us. At our discretion, we may waive the investment minimum.

*Class A units distributed under prior simplified prospectuses have been renamed "Class D" units as of August 13, 2010.

Additional Information

Independent Review Committee

Beutel Goodman Managed Funds Inc., the former Manager of the Beutel Goodman Managed Funds, appointed an Independent Review Committee ("IRC") on May 1, 2007, for each of its public mutual Funds in accordance with the Canadian Securities Administrators' National Instrument 81-107. This Instrument has been designed to promote investor protection in mutual funds. Effective January 1, 2013, as the result of the amalgamation between Beutel Goodman Managed Funds Inc. and Beutel, Goodman & Company Ltd., Beutel, Goodman & Company Ltd. is the Manager of the Beutel Goodman Managed Funds. The IRC actively assumed its role and responsibilities on November 1, 2007. The IRC oversees conflict of interest matters that may arise out of the management of each of the Funds by providing its recommendations or approvals, as required, to the Manager on how these conflicts may be fairly resolved. The IRC for each of the Beutel Goodman Managed Funds consists of three industry professionals, none of whom have an interest in the Funds or Beutel, Goodman & Company Ltd. outside of their roles as members of the IRC. The IRC 2016 Report to Unitholders is available on the Beutel Goodman Managed Funds' website at www.beutelgoodman.com or at the unitholder's request, at no cost, by contacting Beutel, Goodman & Company Ltd. at mutualfunds@beutelgoodman.com.
