Management Discussion of Fund Performance

Investment Objectives and Strategies

This Fund seeks to maximize portfolio returns through capital enhancement and investment income.

The Beutel Goodman Short Term Bond Fund invests primarily in a well-diversified portfolio of short term fixed income securities of Canadian government and corporate issuers. The bonds have a credit rating of BBB or higher by a recognized agency. The average portfolio duration of the Fund is limited to a range of 2 to 4 years.

The fundamental investment objective of the Fund cannot be changed without the approval of a majority of the investors who own units in the Fund.

Risk

The risks of investing in this Fund remain as discussed in the Prospectus.

This Fund continues to be suitable for investors seeking a steady stream of income with a low tolerance for risk and a medium to long-term investment horizon.

Results of Operations

The Beutel Goodman Short Term Bond Fund had a positive return and outperformed its benchmark, the FTSE TMX Canada Short Term Bond Index, over the six month period.

The Bank of Canada kept the overnight rate unchanged at 0.50% over the past six months. The Bank's latest monetary policy release was fairly neutral, noting that the Canadian economy's structural adjustment to the oil price shock continues, but is proving to be uneven. The Bank cautions to look through second quarter growth which is expected to be weaker than previously forecasted due to the Alberta wildfires. The Bank believes that financial conditions remain accommodative; however ongoing geopolitical factors are contributing to fragile market sentiment. Business investment and intentions remain disappointing to the Bank. The Bank notes that the Canadian dollar has been fluctuating in response to shifting expectations of U.S. monetary policy and higher oil prices. Core inflation close to 2% remains in the Bank's estimation, influenced by the offsetting measures of past exchange rate depreciation and excess capacity. Household vulnerabilities have moved higher reflecting a housing market that displays regional divergences. The Bank contends that the risks to the Bank's inflation projection remain roughly balanced.

For the six months ending June 30, 2016, the U.S. Federal Reserve maintained the Federal Funds rate in the 0.25-0.5% target range. It was a roller coaster ride for rate hike expectations during the latter half of the period. After the dovish tone to both Chair Janet Yellen's speech in late March and the Federal Reserve release in April, markets had priced in a near zero chance of a rate hike at the June meeting. Then, following the release of the FOMC Minutes from the April meeting that indicated that June is a possibility for a rate hike, coupled with a myriad of hawkish speeches from voting and non-voting members of the Federal Reserve, the implied probability of a June rate hike increased to approximately 34%. Then there was the release of the dismal employment figures for May which led expectations for a hike in June back down to zero. A pause is exactly what the Federal Reserve delivered in June,

together with a fairly dovish press conference and lowered Fed Funds Rate projections.

The FTSE TMX Short Term Bond Index posted a 1.07% return in the period. The Corporate (+1.61%) sector outperformed the Index while the Municipal (+1.06%), Provincial (+1.05%) and Federal (+0.65%) sectors underperformed. Yields across the Canadian curve decreased by 23 basis points on average whereas yields across the U.S. curve decreased by 67 basis points on average. The flight to quality trade following the Brexit vote sent bond yields plummeting in both markets. Foreign transactions continue to influence the Canadian curve with buying of Canadian product from asset managers, insurance companies and sovereign wealth funds whose domestic interest rates are negative seeking any sort of positive yield.

The bond portfolio outperformed its benchmark during the six month period. Decisions that contributed to performance included our corporate and government sector allocation. Corporates outperformed both provincials and federals and during the period and we were significantly overweight corporates versus the Index while underweight government bonds. Our duration positioning was relatively neutral to performance as we had closed our duration differential during the period. The decision that detracted from performance during the period was the curve positioning as the area of the curve where we are overweight (1-2.5 years) underperformed other areas of the curve.

Relative to its stated investment objectives and strategies the Fund has maintained its quality and diversification standards.

Detailed performance is provided under the heading "Past Performance" in this report.

Recent Developments

On January 11, 2016, Derek Brown joined the firm as Senior Vice President, Fixed Income. He joins David Gregoris as co-lead manager of the Fund.

The markets have completely priced out any chance that the U.S. Federal Reserve hikes the Fed Funds rate in 2016. The strength in the U.S. trade-weighted dollar stemming from the declines in sterling and the euro will likely negatively affect the U.S. economy. The recent tightening of financial conditions will be of utmost concern to the Fed. While the Federal Reserve has finally entered its tightening phase, we believe that this phase will be unlike any other in history. First, this tightening phase will likely be, as indicated by the Federal Reserve, gradual and data dependent. The historical tightening model of recent experience under Chairs Greenspan and Bernanke whereby the Federal Reserve hiked 25 basis points each meeting until it reached its terminal rate is not a guide for Chair Yellen's Fed. As recent dovish actions and speeches have indicated, this will be a very cautious Federal Reserve tightening phase. Additionally, growth may be lower than we have experienced in the past due to secular trends such as demographics as well as global trade flows. This likely means that during this tightening phase, the administered rate will not likely increase as high as in previous recoveries and therefore duration and curve positioning will have to be adjusted accordingly. This will impact both the timing of future interest rate tightening as well as the magnitude.

The duration of the FTSE TMX Canada Short Term Index extended in June and we matched it. We are currently positioned with neutral duration to the Index. We believed that, considering the large degree of uncertainty associated with

Beutel Goodman ■ Short Term Bond Fund

the British referendum and the potential grave effects on the market from a victory for the 'Leave' side, it was prudent to be neutral heading into the vote on June 23rd. We are constructive on corporate credit spreads and participated in some of the new issuance and increased our weighting slightly in corporates at the expense of provincials as opportunities presented themselves. During the period we added four names to the Approved List – North West Redwater LP (NWRP), Bruce Power LP, Bell Canada and Rogers Communications. There were no subtractions to names on our Approved List during the period. We are concentrated and overweight pipelines, utilities, and bank deposit notes.

We are zero weight the cash maturity bucket as we believe that the Bank of Canada will keep an easing bias. We are positioned in the short-end of the curve for the Bank of Canada to remain on hold or ease. Our projected roll return versus that of the Index is positive. We are underweight Government of Canada bonds and overweight corporates and are underweight provincial bonds. With respect to our corporate strategy, with interest rates at extremely low levels, it is tempting to reach for yield into lower quality credits to drive performance. We have resisted the urge to relax our disciplined credit standards to gain extra basis points. We are not enticed to chase yield at the expense of the proper evaluation of credit risk. We believe that credit spreads widening post Brexit will likely create opportunities.

Related Party Transactions

Beutel, Goodman & Company Ltd. is the Portfolio Advisor to this Fund. The Fund did not rely on any recommendation or approval of its Independent Review Committee to proceed with any transaction involving related parties because it did not conduct any related party transactions, except for certain inter-fund trades, as approved by the Independent Review Committee by standing instructions, and subject to regulatory requirements.

Fees and Expenses

The following table lists the fees and expenses that you may have to pay if you invest in the Beutel Goodman Managed Funds. You may have to pay some of these fees and expenses directly. The Funds pay the other fees and expenses. This will reduce the value of your investment in a Fund.

Management Fees: We are entitled to a management fee from each class of each Fund based on the average daily net asset value of the particular class. The fee is payable monthly, in arrears, and is calculated at the annualized rate specified for each class of each Fund below. Management fees for Class I units are negotiated and paid directly by the investor, not by the Fund, and, therefore, are not listed.

Fund	Class	Management Fees (%) ⁽¹⁾
Short Term Bond Fund	B	up to 1.00
Short Term Bond Fund	F	up to 0.50

(1) Excludes GST/HST where applicable.

We may reduce our management fee for certain large investors who have substantial holdings in units of a Fund. To accomplish this, we reduce the management fee we charge to the Fund and the Fund pays out the difference to these investors as a special distribution. This is called a management fee distribution. We calculate and accrue the reduction daily and distribute it quarterly. The distribution is reinvested on behalf of such unitholders in additional units of the same class of the Fund. Management fee reductions for a unitholder may be increased at any time, but may only be decreased after at least 60 days prior written notice has been given to such unitholder.

We may waive our management fee in certain circumstances.

The Fund paid the Manager management fees, inclusive of HST, of \$7,314 for the period ending June 30, 2016. The management fee for each class of unit is calculated as a percentage of its net asset value, as of the close of business on each business day. The Fund's management fees were used by the Manager to pay costs for managing the investment portfolio, providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio and providing other services. The Manager also used the management fees to fund commission payments and other dealer compensation (collectively called "distribution-related costs") to registered dealers and brokers and financial consultants, for units of the Fund bought and held by investors, which amounted to 4.52% of total management fees paid by the Fund to the Manager in 2015.

Operating Expenses: The Manager pays certain operating expenses of the Fund. These expenses include audit and legal fees; custodian and transfer agent fees; costs attributable to the issue, redemption and change of units, including the cost of the security holder record-keeping system; expenses incurred in respect of preparing and distributing all regulatory reports; fund accounting and valuation costs; and filing fees, including those incurred by us. In return, the Fund pays the Manager a fixed administration fee. The administration fee may vary by class of units and by Fund.

Please refer to the Financial Highlights section for the MERs of the classes of units.

Commissions

Commissions paid to brokers for portfolio transactions were as follows:

Fund Name	June 2016	2015	2014
Short Term Bond Fund	\$ NIL	\$ NIL	\$ NIL

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the 6 month period ended June 30, and for the past 5 years ended December 31. The December 31 information is derived from the Fund's audited annual financial statements and is provided for each class of units.

- (1) The information for June 2016, December 2015, December 2014 and December 2013 is derived from the Fund's financial statements prepared in accordance with IFRS. The information for prior years is derived from the Fund's annual audited financial statements prepared based on Canadian GAAP.
- (2) Net assets attributable to holders of redeemable units per unit and distributions to holders of redeemable units per unit are based on the actual number of redeemable units outstanding for the relevant class at the relevant time. The increase (decrease) in net assets attributable to holders of redeemable units per unit is based on the weighted average number of redeemable units outstanding for the relevant class over the fiscal period.
- (3) Distributions were paid in cash or automatically reinvested in additional redeemable units of the Fund.
- (4) This is not a reconciliation of the beginning and ending net assets per redeemable unit.
- (5) This information is provided as at period end of the period shown.
- (6) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily net asset value during the period.
- (7) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal year. The higher a Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate equals the lesser of purchases or sales divided by the average value of the portfolio securities of the Fund on a monthly basis, excluding short-term securities.
- (8) The trading expense ratio represents total commissions and other portfolio transaction costs disclosed in the Statements of Comprehensive Income expressed as an annualized percentage of daily average net asset value of the Fund during the period.
- (9) The information for June 2016, December 2015, December 2014 and December 2013 is derived from the Fund's financial statements prepared in accordance with IFRS. Prior to January 1, 2013, for the purpose of processing unitholder transactions, net assets were calculated based on the closing market price, while for financial statement purposes net assets were calculated based on bid/ask price. For the period ending June 30, 2016 and for the years ended December 31, 2015, December 31, 2014 and December 31, 2013, the information provided for processing unitholder transactions is consistent with the information provided for reporting purposes.

Past Performance

The past performance of each class of units of a Fund, if the class has been in continuous existence and offered to the public for at least 12 months (at the date of this document), is explained under the Year-by-Year Returns and Annual Compound Returns headings found below. In years where the class of a Fund has less than 12 months of performance data, the annual rate of return has been annualized.

The performance returns in all cases:

- are calculated as of **December 31** in each year and for the first 6 months of the current year;
- assume **all distributions** made by the Fund are **reinvested** to purchase additional redeemable units; and
- show the returns of the particular class of the Fund after any applicable management fees and operating expenses have been deducted, **but are not reduced by any redemption charges, optional charges or income taxes payable by you.**

Please remember that the past performance of the Fund is not an accurate prediction of future returns.

Beutel Goodman ■ Short Term Bond Fund

Year-by-Year Returns

Class B

Class F

Class I

Annual Compound Returns

The following table shows the historical annual compound total return, as compared to the performance of the FTSE TMX Canada Short Term Bond Index.

Class B	Since Inception	Past 5 Years	Past 3 Years	Past Year
Beutel Goodman Short Term Bond Fund – Class B	1.26%	1.39%	1.50%	0.67%
FTSE TMX Canada Short Term Bond Index	2.58%	2.67%	2.73%	1.55%

For Class B units, a return calculated since its inception of October 4, 2010 and ended June 30, 2016, and for the past five, three and one year periods ended June 30, 2016 has been provided.

Class F	Since Inception	Past 5 Years	Past 3 Years	Past Year
Beutel Goodman Short Term Bond Fund – Class F	1.89%	2.02%	2.10%	1.26%
FTSE TMX Canada Short Term Bond Index	2.58%	2.67%	2.73%	1.55%

For Class F units, a return calculated since its inception of October 4, 2010 and ended June 30, 2016, and for the past five, three and one year periods ended June 30, 2016 has been provided.

Class I	Since Inception	Past 5 Years	Past 3 Years	Past Year
Beutel Goodman Short Term Bond Fund – Class I	4.51%	2.61%	2.73%	1.89%
FTSE TMX Canada Short Term Bond Index	3.92%	2.67%	2.73%	1.55%

For Class I units, a return calculated since its inception of July 1, 2006 to June 30, 2016 and for the past five, three and one year periods ended June 30, 2016 has been provided.

The fund was not a reporting issuer for the period since its inception to August 13, 2010. The expenses of the fund would have been higher during such period had the fund been subject to the additional regulatory requirements applicable to a reporting issuer. The financial statements of the fund for such period are available to Class I investors upon request.

Other Material Information

Classes of Units: Each of the Funds in the Beutel Goodman family of Funds issues Class B, Class D (formerly Class A), Class F and Class I units, with the exception of the Beutel Goodman Fundamental Canadian Equity Fund, Beutel Goodman Global Dividend Fund and Beutel Goodman Short Term Bond Fund, which issue only Class B, Class F and Class I units. Expenses of each class are tracked separately and a separate net asset is calculated for each class.

The Beutel Goodman Short Term Bond Fund is available in 3 classes of units: Class B, Class F and Class I.

Each Fund may issue an unlimited number of classes of units and may issue an unlimited number of units of each class. The different classes of units of a Fund represent an interest in the same portfolio investments of the Fund.

Class B Units: for retail investors investing a minimum of \$5,000 in a Fund through authorized third-party dealers;

Class F Units: for investors investing a minimum of \$5,000 in a Fund, who are enrolled in a dealer-sponsored fee-for-service or wrap program (where various mutual funds are bundled together) who are subject to a periodic asset-based fee, rather than commissions on each transaction and whose dealer has signed a Class F agreement, or any other investors for whom we do not incur distribution costs, such as our employees (or affiliated corporations);

Class I Units: for investors who have invested a minimum of \$500,000 in a Fund and who have entered into an investment management agreement with us. At our discretion, we may waive the investment minimum.

Additional Information

Independent Review Committee

Beutel Goodman Managed Funds Inc., the former Manager of the Beutel Goodman Managed Funds, appointed an Independent Review Committee ("IRC") on May 1, 2007, for each of its public mutual Funds in accordance with the Canadian Securities Administrators' National Instrument 81-107. This Instrument has been designed to promote investor protection in mutual funds. Effective January 1, 2013, as the result of the amalgamation between Beutel Goodman Managed Funds Inc. and Beutel, Goodman & Company Ltd., Beutel, Goodman & Company Ltd. is the Manager of the Beutel Goodman Managed Funds. The IRC actively assumed its role and responsibilities on November 1, 2007. The IRC oversees conflict of interest matters that may arise out of the management of each of the Funds by providing its recommendations or approvals, as required, to the Manager on how these conflicts may be fairly resolved. The IRC for each of the Beutel Goodman Managed Funds consists of three industry professionals, none of whom have an interest in the Funds or Beutel, Goodman & Company Ltd. outside of their roles as members of the IRC. The IRC 2015 Report to Unitholders is available on the Beutel Goodman Managed Funds' website at www.beutelgoodman.com or at the unitholder's request, at no cost, by contacting Beutel, Goodman & Co. Ltd. at mutualfunds@beutelgoodman.com.
